

Now available for your patients aged 2 and up

Our most delicate patients deserve the best care, yet without EEG how would you know?

Critically ill patients are at high risk for non-convulsive seizures that can cause long term cognitive disability.^{1,2}

Ceribell is the first bedside EEG brain monitoring tool for your critical pediatric patients at-risk for seizure.

- Set up by ANY healthcare provider for seizure triage within minutes
- Headband options designed to gently fit a variety of head sizes
- Pocket-sized recorder with on-screen seizure risk stratification and EEG view
- Real-time data streaming for remote EEG data review anywhere

CAUTION: FEDERAL (US) LAW RESTRICTS THIS DEVICE TO SALE BY OR ON THE ORDER OF A PHYSICIAN. REFER TO OPERATOR MANUAL AND LABELING FOR INDICATIONS, CONTRAINDICATIONS, WARNINGS, PRECAUTIONS AND INSTRUCTIONS FOR USE.
